

## Lesson Description

Mapping involves assigning a unique address to each node on the network so they can communicate with the PLC, or Programmable Logic Controller. This lesson takes the learner step by step through process of mapping nodes using RSNetworx for DeviceNet.

## Lesson Scope

Learners who successfully complete this lesson should be able to:

1. Explain what node commissioning is.
2. Describe the process in RSNetWorx for assigning a unique input and output address to each node.
