

Lesson Description

Control Flash is a software program provided by Rockwell Automation for the purpose of maintaining the firmware revisions of many different types of controllers and communication modules. Control Flash software uses RSLinx software also from Rockwell Automation to communicate on a network such as DeviceNet. This lesson describes the process of “Flashing” a device like the 1756-DNB, and details the caution that must be taken when performing this action.

Lesson Scope

Learners who successfully complete this lesson should be able to:

1. Explain how to launch ControlFLASH.
2. Navigate through ControlFLASH.
3. Flash modules.
